

Giles Palmer is a clinical embryologist, skilled in IVF laboratory management. After graduating in Genetics at Leeds University, UK he worked as a research officer at London's Hammersmith Hospital's acclaimed IVF unit working with Professors Lord Winston and Alan Handyside. In the following years he worked as laboratory manager and clinic director in IVF clinics in Greece while consulting in several countries including Iceland, Nigeria, and the Balkan states.

His research collaboration with St. Sophia's Children's Hospital (Athens University) resulted in the first births in Greece following embryo-biopsy and pre-implantation genetic diagnosis. He has published in leading scientific journals on a variety of topics including pre-implantation genetic testing for Cystic Fibrosis and B-thalassaemia, Morpho-kinetics, and Quality Management. He is a certified HCPC clinical scientist in the UK and has been accredited with Senior Embryologist Status by ESHRE.

More recently, Giles, has become a consultant for IVF clinics, Institute of Life, Athens and Nordica Fertility Centre in Lagos and product developer in a wide range of areas within the industry.

He is the executive director for the International IVF Initiative, a non-profit global educational project for the Assisted Reproductive Technologies (ART) community and an honorary lecturer on Reproductive and development at Bristol University, UK.
